Teacher Connect sessions are recommended for your child to collaborate with their class and to get direct instruction with their teacher and interaction with classmates. Teachers are providing instructional videos in the event a student cannot attend a zoom meeting. The videos of lessons will be uploaded to Edmodo. For security, Zoom sessions Invites and passwords are communicated only through Edmodo. Students will enter through the waiting room and must have video on for identification purposes. There may be days that the teacher or your child cannot log into Zoom meetings. Understanding and flexibility are important during these uncharted times. We realize the internet may be slow or down, technology may need to be shared, and staff, students and families may have young children at home, etc. We will do our best to accommodate. If live Teacher Connect is not an option for your child, make sure to check with your teachers daily through email and Edmodo.

To support students with IEPs, school districts are given flexibility to provide alternative services with their ESE providers. Mrs. DiMartino, Ms. Balbi, Mrs. Emerson, and Mrs. Arnold contacted families and setup a schedule for flexible servicing during the afternoon hours. Laptop distribution has been conducted to any student in need of technology. In addition, teachers have setup additional small group Teacher connect sessions to provide additional support to the ESE students and those needing additional support. Q&A Sessions are open for students requiring additional support.

If you need assistance from our counselor, Ms. Cronin, please email her directly at elaine.cronin@imagineschools.org or call 954-983-0212.

For technology support, call Jessica Tabora at 954-546-0748 or email jessica.tabora@imagineschools.org
