

2022-2023 QUARTERLY K-5 READING AND MATHEMATICS PROGRESS MONITORING PLAN (PMP) CRITERIA

(Revised 9/19/22)

If performance data indicate the student is working below proficiency, a PMP should be initiated; intervention instruction provided; and more frequent progress monitoring administered to target student's identified needs.

The following criteria should be used to initiate a Progress Monitoring Plan (PMP) for students in reading and/or mathematics.

If a student progresses to grade level proficiency, the PMP intervention may be discontinued following a parent/teacher conference, where it is documented on the conference form that the intervention will be discontinued due to the student's progression to proficient grade level performance. The teacher and parent must then sign the conference form.

Caution is warranted in removing a student from a PMP before the summative outcome assessment measure has been administered at the end of the school year to confirm sustained proficiency level achievement.
